This document constitutes an estimate of costs for Ruby Ranch Water Supply Corporation ("RRWSC") to provide water service to Applicant, including setting a meter at Applicant's property. RRWSC makes no representations, verbal or written, other than those in this estimate. This is not a commitment to provide water service. The commitment to provide water service will be made only after all documents are received by RRWSC, subsequently reviewed, and deemed by RRWSC to be in compliance with RRWSC's current Tariff, and all fees are paid. After the line extension has been completed, the final cost of the line extension will be reconciled with the payments made by Applicant. If the final cost of the line extension is less than the amounts paid by Applicant, the difference shall be refunded to Applicant within thirty (30) days of completion of the Line extension. If the final cost of the Line extension is greater than the amounts paid by Applicant, Applicant shall pay RRWSC the difference within ten (10) days after receipt of notice of the balance due. After sixty (60) days from the date stated above, this estimate expressly expires and may be extended only by the development of another Cost Estimate to Provide Water Service by RRWSC or by an express written extension of this estimate to a date certain, not to exceed sixty (60) days.
